

Appn. Number 10/ 729,757 (Powers et al.) GAU 3761 Amnt. A contd. 3 of 5

38. (NEW) A device as recited in claim 28 wherein said device contains an internal bladder for segregating an air volume internal to said dispenser from the volume of said skin treatment material contained within said device, thereby facilitating the use of said device at arbitrary orientations with respect to gravity, independent of the relative viscosity of said skin treatment material.

39. (NEW) A device as recited in claim 28 in which said outlet means includes provision for adjusting the character of the dispensed material flow from streaming flow to spray.

40. (NEW) A device as recited in claim 28 wherein said device is removably attached to said attachment means.

41. (NEW) A device as recited in claim 28 wherein said dispensing outlet means comprises adjustable nozzle means.

42. (NEW) A device as recited in claim 28 wherein said attachment means contains a working fluid volume in fluid communication with the interior of said device so that said device can be actuated by squeezing of said attachment means.

43. (NEW) A device as recited in claim 28 wherein said device includes time display means.

44. (NEW) An extremity-attachable device for storing and discharging skin treatment material, said device comprising in combination:

- a) a reservoir containing said skin treatment material;
- b) squeeze actuation means;
- c) dispensing outlet means;
- d) extremity attachment means; and
- e) leak prevention means,

said device capable of releasing an amount of said skin treatment material through said dispensing outlet means when said actuation means is used and said leak prevention means prohibiting leakage of said skin treatment material.

45. (NEW) A device as recited in claim 44 wherein said leak prevention means comprises valve means.
